Education

University of California, Santa Cruz

Graduation: May 2021

B.S. Computer Science

GPA: 3.81

- Coursework: Data structure, Algorithms, Discrete structure, Linear Algebra.

Work Experience

Innovation Technology Development Corporation

May – August 2018

.NET Developer Intern

- Developed a desktop application to manage tickets for smart parking lots in a team of 6.
- Refactored code and implemented more than 50% new functionalities of the application.
- The application helped parking lots save a significant time as well as money compared to the traditional parking lot.

Personal Project

Portfolio Website

June 2019

- Built a responsive portfolio website with mobile mode by ReactJS.
- Used Firebase to store data, host the website as well as link it to the domain

Memory Game

December 2019

- Created a memory game that let user set difficulty by adjusting number of move they can make by using React Hook.
- Preload image for smoother gameplay

To-do list

January 2020

- Built a to-do list app using Flutter and Firebase for authentication and cloud database.
- Smooth UI with ability to switch between dark/light theme.
